

## GRADUATE DIVISION PROGRAM OUTCOMES:

PhD 2018 – 2020  
MD-PhD 2019 - 2021

<b>Publications:</b>	<b>PhD</b>	<b>MD-PhD</b>	<b>All</b>
Total number of graduating PhD students per 3 year period with one or more 1 <sup>st</sup> author publications in peer-reviewed scientific journals	75 (90%)	34 (89%)	109 (90%)

	<b>PhD</b>	<b>MD-PhD</b>	<b>All</b>
Average number of 1st author publications per graduating PhD student	1.55	2.53	1.86
Average number of total publications per graduating PhD student	4.67	5.34	4.88

<b>First job after graduation:</b>	<b>PhD</b>	<b>MD-PhD</b>	<b>All</b>
Academic	43 (52%)	38 (100%)	81 (67%)
Non-academic*	35 (42%)	0 (0%)	35 (29%)
Unknown	5 (6%)	0 (0%)	5 (4%)

\*includes science-related careers

*\*Important note: Einstein uses the designations “academic” and “non-academic” to characterize jobs after graduation. Since the NIH Director’s Biomedical Research Workforce Report (2012), it has been widely recognized that many PhD graduates enter both tenure-track positions as well as science-related careers in a wide-variety of areas. Therefore, the NIH recognizes that any science-related career, whether academic or non-academic, is a favorable outcome for a PhD program. Under this definition, nearly all Einstein PhD graduates (>95%) are considered to be in science-related careers.*
