Dear Einstein Community:

It is with mixed emotions that we share the following news: On June 30, 2022, Christina M. Coyle, M.D., M.S., will be stepping down as Einstein's assistant dean for faculty development to concentrate on her highly successful grant-funded collaborations with the U.S. Centers for Disease Control and Prevention (CDC), her work as a site director for GeoSentinel (the global surveillance network of the International Society of Travel Medicine and the CDC), and her leadership role as director of the Clinical Infectious Disease Service at Jacobi Medical Center. She also will be extending her involvement with the WHO Guideline Development Group for the treatment of patients with cystic echinococcosis, and as a content expert for the CDC for all complicated cases of echinococcosis.

We are thrilled for Christina and the opportunities that she will undertake, undoubtedly with the same verve, tenacity, and results that we’ve become accustomed to at Einstein. We are sincerely grateful for her dedicated leadership of faculty development over the past 14 years as she worked tirelessly to develop a robust program focused on meeting the ever-changing needs of our faculty. When the COVID-19 pandemic struck, Christina deftly adapted faculty training to a virtual format to ensure continuity of programming. This resulted in broader engagement across a tremendous variety of offerings. Thanks to the foundation that Christina has established, her successor will be able to build upon the variety of popular workshops, programs, and helpful resources available to our faculty.

Christina will remain a member of our Einstein faculty. As a professor of medicine in the infectious diseases division, she is a beloved educator in the classroom and on the wards. A recipient of the Harry H. Gordon Award for Outstanding Clinical Teaching and a faculty inductee of the Alpha Omega Alpha Honor Society, she will continue to lead our M.D. parasitology education, now housed within the Infectious Diseases course, and she will teach our clinical M.D. students and house staff at Jacobi.

In the near future, Josh will be charging a committee to conduct a search for our next assistant dean to fill this important role. In the meantime, please join us in
thanking Christina for all she has done to provide our faculty with ample opportunities for development and growth, and in applauding her for the important work she is doing in the Bronx and globally.

Sincerely,

Gordon F. Tomaselli, M.D.
The Marilyn and Stanley M. Katz Dean
