Providers
Public
NCATS

The Trial Innovation Network is a collaborative initiative within the CTSA Program and is composed of three key organizational partners – **the CTSA Program Hubs, the Trial Innovation Centers (TICs),** and **the Recruitment Innovation Center (RIC).** All are key partners of the Trial Innovation Network and make unique and essential contributions. Other important partners include NIH Institutes, other federal and non-federal stakeholders, researchers, patients, providers, and the public.

Industry

Recruitment Innovation Center (RIC)

The Recruitment Innovation Center aims to become a successful, evidence based Center in recruitment and retention strategies in order to improve both the quality of future clinical trials and to raise awareness of the value of research thereby increasing trial enrollment and health outcomes across America.

Trial Innovation Network Hub Liaison Teams

The multi-disciplinary Hub Liaison Teams lead scientific, training, and implementation aspects of the Trial Innovation Network, using their experience and knowledge of the local environment to innovatively operationalize the Network at their Institutions, tailoring general Network plans into more specific action plans best suited for their Hubs.

Trial Innovation Centers (TICs)

Trial Innovation Centers are focused on operational excellence, operational innovation, and quality by design. The Trial Innovation Centers are charged with coordinating innovative, high quality operational support for clinical trials.

How can the RIC & TICs support your study?

RIC Services	Trial/Study Stages	TIC Services
	Planning	• Protocol Design • Study Budget • Assessment of Study Feasibility
• Feasability Assessment • Cohort Discovery • Recruitment Plan		
	Start Up	• **Standard Agreements** • **Central IRB** • Regulatory Approvals (IRB, IND, IDE) • CRF Development • Site Training • Operational Compliance (CT.gov, PAC)
• Engagement Studios • Recruitment Materials		
	Implementation	• Site Performance Monitoring/Metrics • Enrollment & Retention/Metrics • Data Management • Risk Based Site Monitoring • DSMB Organization & Management • Trial Project Management
• Participant Identification • Updated Recruitment Plans		
	Close Out Publications	• Study Closeout/Database Lock • Statistical Analysis/Results • Study Publication/Presentation • Data Archiving/Data Sharing
• Recruitment Methods
