Family of Isabelle Rapin, MD, Continues Her Legacy Through Philanthropy

Dr. Isabelle Rapin, a professor (and later professor emerita) in the Saul R. Korey Department of Neurology and of pediatrics—and an international pioneer in the field of child neurology—spent over 50 years at Einstein studying, teaching, mentoring, and changing the lives of pediatric patients and their families. Her eagerness to learn and share knowledge made her a respected and admired colleague and leader. Though she passed away in 2017, we are pleased to share that Dr. Rapin's family is continuing her important work by directing support from Dr. Rapin's generous bequest to benefit the **Isabelle Rapin Child Neurology Division at Einstein/Montefiore**.

The mission of the Isabelle Rapin Child Neurology division is to "provide outstanding clinical care through translational research dedicated to the well-being of children with neurological diseases and to train future child neurologists." We are so grateful to Dr. Rapin's family for supporting the work that comprised so much of her legacy during her distinguished career.
